

## Stormwater Control Plan: Land Development Project – Exemption Form

**Project ID for Tracking (for City Staff only):**

---

The California Regional Water Quality Control Board for the Central Coast Region (Water Board) adopted the Post-Construction Requirements (PCRs) in July 2013. As of March 6, 2014, development projects that create or replace 2,500 square feet\* or more of impervious surface (roofs or pavement) must incorporate specified measures to reduce runoff. This requirement is part of municipalities' comprehensive effort to reduce runoff pollution.

\*Projects that create or replace 5,000 square feet or more of impervious surface except for detached single-family homes, and single-family homes that create or replace 15,000 square feet or more of impervious surface, require a more comprehensive Stormwater Control Plan. See Santa Barbara Project Clean Water's *Stormwater Technical Guide*.

### Exemption (check which applies)

- The project creates or replaces less than 2,500 square feet of impervious area.
- Previous land use approval. The project has received land use approval prior to March 6, 2014. List project number:
